How every payment stays safe

1 **Nest checks it first**
If it looks like a scam, you see why before you send.

2 **Only you can approve it**
Every payment needs your Face ID, fingerprint or PIN.

3 **It arrives in a second**
Your family gets US dollars, and nobody pays a fee.

4 **24 hours to undo**
Pay someone new and you have a day to undo it.

Under the hood: USDC on Solana, 24-hour on-chain escrow for new payees, passkey signing, offline sends by signed text message.

Try the undo at our table.
